PROJECTS

Online Job Search Website

I made a job search website, a website that aims to make job searching easier and more efficient for users.

- Tools used: HTML, CSS, JAVASCRIPT, ReactJS, RAPID API.

YouTube Clone

Cloning a website or application can offer several benefits, especially when you're trying to learn new development skills or build a new project.

- At the end of the project, I have created a functional YouTube Clone UI, and I have gained a deeper understanding of how HTML and CSS work together to build websites.

SKILLS

Tools

DSA · C++ · HTML · CSS · JAVASCRIPT · SQL

STRENGTHS

★ PROBLEM SOLVING

Solved many problems on Data structures and algorithm in C++ language on platform like leetcode.

★ Front end development

I have designed some website clones to practice html and css.
